ABSTRACT

An extensive and intensive field survey were conducted to find out the extent of availability of the medicinal plants in 37 villages in Senapati district, Manipur during 2008 to 2010. Altogether 176 medicinal plants have been collected, among them 111 plants have been identified and the remaining 65 plants are yet to be unidentified. Out of the total collected plants it has been observed that 33 plants such as *Aerisaema tortuosum*, *Blumeopsis falcata*, *Clerodendrum colebrookianum*, *Croton caudatus*, *Curcuma caesia*, *Curcuma leucorrhiza*, *Hydrocotyle sibthorpioides*, *Melothria purpusila*, *Cucumis sp.*, *Paris polyphylla*, *Potentilla anserina*, *Scutelleria discolor*, *Zingiber sp.*, *Rhaphidophora laciniate*, *Taxus baccata*, *Goniothalamus sesquipedalis*, *Hodgsonia macrocarpa*, *Thalictrum foliolosum*, *Smilax ovalifolia*, *Bergenia ciliata*, *Stemona tuberosa*, *Rauvolfia serpentina*, *Taxillus lonicerifolius*, *Coix lacryma-jobi*, *Phlogacanthus jenkinsii*, *Kaemferia galanga*, *Mimosa pudica*, *Solanum nigrum*, *Vitex negundo*, *Phyllanthus niruri*, *Drymaria cordata*, *Asparagus racemosus*, *Tacca chantreieri* are very rare medicinal plants. Among the identified plants 19 plants are internationally known plants and their bio-active molecules have been identified. The plants are *Acorus calamus*, *Ariaema tortosum*, *Artemisia nilagirica*, *Centella asiatica*, *Cephaelotaxus harringtonia*, *Clerodendrum colebrookianum*, *Costus speciosus*, *Croton caudatus*, *Curcuma caesia*, *Elephantopus scaber*, *Goniothalamus sesquipedalis*, *Hedychium spicatum*, *kaemferia galangal*, *Paris polyphylla*, *Phyllanthus niruri*, *Potentilla anserina*, *Rauvolfia serpentine*, *Taxus baccata*, *Thalictrum foliolosum*. During the survey, exact location of the plants were documented by using GPS and presented by using GIS software. The paper will highlight about the satellite location ranges of the identified plants and their medicinal uses, their bio-active molecules as well as location and habited where the plants are being naturally grown are mentioned.

Keywords: Geo-spatial, Data base, Medicinal plant, Tribe, Senapati, Manipur

I. INTRODUCTION

The use of medicinal plants in the treatment of diseases was conceived by tribal people thousands of years ago. The tribal people and ethnic races throughout the world have developed their own cultures, customs, cults, religious rites, taboos, legends and myths folk tales and songs, food, medicinal practices etc. They have been using several plants and their various parts by collecting from near and around their settlement for medical preparation and these medicines are known as ethnomedicine. The collected plants are recorded with the help of GPS to know their extent of availability at the natural habitat. Various wild and cultivated plants play a very important & vital role among these cultures. This interrelationship has evolved over generation of experience and practices. It is noticed that a plant is used for a disease in different ways and for different types of diseases. The medicinal plants in particular have received the attention of

Scientists for chemical, pharmacological and clinical angles in India and abroad. Ethnobotanical data base studies assume great importance in enhancing our knowledge about the plants found at their natural habitat used by native/tribal communities, the rich diversity assembled by them for their sustenance and the different means adopted by them for its prevention and conservation⁴. A vast knowledge on medicinal plants exists as oral among the folklore and traditional medicine men of India, where a large number of potent medicinal herbs are found growing wild. However, the young generation is not interested to hold this invaluable traditional knowledge transmitted orally from generation to generation. Therefore, before this traditional knowledge is lost forever it must be documented properly with data basing system and sustainable utilization of these medicinal plants depends on the judicial application of sciences and technology.

Senapati district is located at the northern site at a distance of 60 km from Imphal which passes NH 37 and lies between $N 24^{\circ}38.828 - N 25^{\circ}91.865$ Latitudes, $E 093^{\circ}45.243 - E 094^{\circ}59.425$ Longitudes, Elevation: 880 - 4615 msl and covering an area of 3271 sq km. It has immense scope of ethnobotanical data base studies of Medicinal plants due to natural forest coverage. Due to poor transportation and medical facilities in the rural areas, the rural folk to a great extent still hold onto their traditional faith in local medicine men and wild herbal plants.

II. METHODOLOGY

A data basing field survey was carried out in 6 sub-division, namely Mao Maram (inhabited by Nagas), Paomata (inhabited by Naga), Purul (inhabited by Naga), Kangpokpi (inhabited by Kuki), Saikul (inhabited by Kuki), Saitu Gamphazol (inhabited by Kuki) of Senapati district, Manipur during March 2008 - March 2010. Each division consisted of six survey team, each team comprising two persons one village elders (a local expert) and a field assistant who did the write up. These teams visited the natural habitats and eco-system of 37 villages and assess the extent of availability of the medicinal herbs with the help of GPS and mapped on the satellite district map with the help of GIS software (Fig. 1) and then took the photograph of each plant at their natural habitat. The information were collected and documented including traditional medicinal uses of plants along with plant parts used and from literature the chemical composition and active principles were documented and then tabulated. The collected medicinal plants are identified with the help of a taxonomist.

III. RESULT AND DISCUSSION

Manipur lies in one of the hot spots and naturally rich in flora and fauna. Traditional system of medicine is prevalent in Manipur since times immemorial making use of the plant found around.

A total of 176 plants have been found to be used for medicinal purposes by the Senapati tribes. Out of

these 176 plants 111 plants have been identified, their Botanical names followed by Family, Local name, Parts used, Locality, Satellite location ranges Medicinal/Ethnobotanical uses are given in alphabetical order (Table 1). Different parts of plants like leaves, root, rhizome, inflorescence, fruit, seed etc. being used for different purposes. About 7 plants for Blood pressure, 7 plants for Cancer, 14 plants for Cough and asthma, 9 plants for diabetes, 9 plants for digestive disorder, 5 plants for gastritis, 3 plants for gout, 6 plants for jaundice, 5 plants for liver diseases, 8 plants for malaria, 7 plants for piles, 5 plants for sinus, 10 plants for skin diseases, 11 plants for stone case etc. Sometimes, a single species is used to cure more than one disease. A few such species are *Acorus calamus*, *Alocasia indica*, *Aloe barbadensis*, *Bergenia ciliata*, *Blumeopsis falcate*, *Centella asiatica*, *Clerodendrum colebrookianum*, *Croton caudatus*, *Cucumis sp*, *Curcuma caesia*, *Dendrobium aphyllum*, *Drymaria cordata*, *Elephantopus scaber*, *Eupatorium nodiflorum*, *Hedyotis auriculata*, *Hodgsonia macrocarpa*, *Houttuinia cordata*, *Hydrocotyl*, *Kaempferia galanga*, *Mimosa pudica*, *Phylanthus niruri*, *Rauvolfia serpentine*, *Solanum nigrum*, *Stemona tuberosa*, *Tinospora cordifolia*, *Xanthium strumarium*, *Zanthoxylum acanthopodium* etc. Biochemical analysis of some medicinal plants have been documented from the literature⁶ (Table 2). Use of 176 plants species for ethnomedicinal purposes by the tribals of Senapati district belonging to 50 families. Photographs of some of the medicinal plants have been attached at the Plate - I, II, III, IV. Ethnobotanical data basing investigations into the tribal communities of Senapati district have been made by earlier worker with different perspectives. The study has revealed the utilization of 176 species of plants in ethnomedicine by the tribes of Senapati district, Manipur. The inventory in Louraceae family of semi evergreen forest site of Manipur revealed the presence of 24 species⁷. Further investigations into the pharmacological importance of such plants and their diversity may add new knowledge to the information in the traditional medical and cultural system of Senapati district, Manipur.

Table 1. Geo spatial database of Medicinal plants of Senapati district

Sl. No	Scientific Name	Family	Local Name	Parts used	Locality	Satellite location range	Medicinal Uses
1.	<i>Acorus calamus</i> Linn.	Araceae	Okhidak (Manipuri) /Abakha (Maram)	Rhizome	Makui II, Willong	N 25°06.622' - N 25°07.442' E 093°49.742'-E 093°50.078' Elevation: 2867m – 3420m	Snake bite, epilepsy, bronchitis, hoarseness
2.	<i>Allium hookerii</i> Linn.	Liliaceae	Maroi napakpi (Manipuri)	Root, leaves	Changou-bung	N25°11.027' - N 25°11.615' E 093° 58.799'- E 093°58.882' Elevation: 1172m - 1278m	High blood pressure, stomach ulcer
3.	<i>Allium odorum</i> Spring.	Liliaceae	Maroi nakuppi(Manipuri)	Root, leaves	Changou-bung	N25°11.027' - N 25°11.615'E 093°58.799'- E 093°58.882' Elevation: 1172m - 1278m	Improving hair growth
4.	<i>Alocasia indica</i> Schott.	Araceae	Hong-ngoo(Manipuri)	Tuber, leaves	Changou-bung	N25°11.027' - N 25°11.615'E 093°58.799'-E 093°58.882' Elevation: 1172m - 1278m	Laxative, diuretic, piles, constipation
5.	<i>Aloe barbadensis</i> Mill.	Liliaceae	Aloe vera (Manipuri)	Leaves	Willong	N 25°26.821' - N 25°29.264' E 093° 58.184'-E 094°59.389' Elevation: 1645m - 1758m	Cancer, burns, skin diseases
6.	<i>Amaranthus species</i>	Amarantha-ceae	Chengkruk angangba(Mani.)/Jat (Paomai)	Leaves, stem	Purul atongba	N 25°22.501' - N 25°22.592' E 094° 13.864'-E 094°13.873' Elevation 1685-1696m	Diabetes
7.	<i>Aphanamixis polystachya</i> (Wall.) Parker.	Meliaceae	Heirangkhoi (Manipuri)/ Majoungsibang (Liangmei)	Leaves	Makui I, Lanka, Makui III	N 25°07.733' - N 25°07.801' E 093°47.215' – E 3°47.749' Elevation: 2698m – 2997m, N 25°02.006'-N 25°04.067', E 093°45.723'-E 093°47.595' Elevation: 880m-1002m, N 25°07.552' E 093° 48.635' Elevation: 1333m	Malaria, fever
8.	<i>Arisaema tortuosum</i> Schoot.	Araceae	Lin cheisu (Manipuri)	Rhizome, leaves	Persaikuti, Songpikom, Makui III	N 25°13•997', E 093°59•531' Elevation: 1344m N 25° 91•865', E 093°58•995' Elevation: 1338 m N 25°07.552' E 093° 48.635' Elevation: 1333m	Snake bite, dropsy

Sl. No	Scientific Name	Family	Local Name	Parts used	Locality	Satellite location range	Medicinal Uses
9.	<i>Artemisia nilagirica</i> (CB Clarke) Pamp.	Asteraceae	Leibakngou (Manipuri)	Leaves	Teagarden, Mayangk-hang	N 25°13.944' - N 25°13.989' E 094°00.264' - E 94°00.285' Elevation: 1170m – 1195m, N 25°11.946' - N 25°12.036' E 093°59.978'-E 094°00.029' Elevation: 1154m - 1164m	Insect repellant, antiseptic
10.	<i>Asparagus racemosus</i> Willd.	Liliaceae	Nungarei (Manipur) / Hiiring (Maram)	Root	Willong	N 25°26.821' - N 25°29.264' E 093°58.184'-E 094°59.389' Elevation: 1645m - 1758m	Gastritis
11.	<i>Azadiracta indica</i> Juss.	Meliaceae	Neem (Manipur) / Ponsop (Thadou)	Leaves, fruit, bark	Saikul Lhung-jang, T Waichong	N 25°01.306' - N 25°01.919' E 093°57.340' - E 093°57.934' Elevation: 2694m – 2770m, N 25°13.862'-N 25°14.233' E 093°50.382'-E 93°50.948' Elevation: 2684m - 3116m	Malaria, Pile case
12.	<i>Basella alba</i> Linn.	Basella-ceae	Urok sumban (Mani.)/Novu (Paomai)	Leaves	Purul akutpa	N 25°22.114' - N 25°22.253' E 094°13.848'-E 094°13.860' Elevation 1645-1652m	Lowering blood pressure
13.	<i>Bergenia ciliata</i> (Haw.) Sternb.	Saxifragaceae	Tatenpiu (Liangmai)	Root, leaves	Shamuk	N 25°01.147' - N 25°03.730' E 093°47.472'-E 093°47.860' Elevation: 1002m - 1288m	Blood cancer, stomach disorder, sinus etc.
14.	<i>Blumeopsis falcate</i> (D.Don) Merr.	Astera-ceae	Haochak (Manipuri)	Leaves	Persalkuti	N 25°13•997' E 093°59•531' Elevation: 1344m	Bronchial congestion, catarrh and cold
15.	<i>Botrychium ternatum</i> Sw.	Ophioglossaceae	Machiubang (Liangmai)	Leaves	Lanka	N 25°02.006' N 25°04.067', E 093°45.723'-E 093°47.595' Elevation: 880m-1002m	Dysentery
16.	<i>Brucea javanica</i> Linn./ Merr.	Simarouba-ceae	Toilheng (Thadou) / Heining (Manipuri)	Leaves	T. Vaichong, Makui III	N 25°13.862'-N 25°14.233' E 093°50.382'-E 93°50.948' Elevation: 2684m - 3116m N 25°07.552' E 093°48.635' Elevation: 1333m	Night blindness
17.	<i>Bryophyllum pinnatum</i> Lam.	Crassula-ceae	Meikahlou (Thodou) / Mirouhui (Zeme)	Leaves	Saikul-Lhungjang, Makulalongdi	N 25°01.306' - N 25°01.919' E 093°57.340'- E 093°57.934' Elevation: 2694m – 2770m N 25°20.185' - N 25°21.265' E 093°57.794'-E 94°59.172' Elevation: 1479m – 1785m	Used in the burn area
18.	<i>Cardamine hirsuta</i> Linn.	Brassicaceae	Uchi hangam (Manipuri) / Uichomngong(Thodou)	Leaves	Saikul-Ankhong-bung, Makulalongdi	N 25°01.432' - N 25°01.842' E 093°57.212'- E 093°57.853' Elevation: 2719m – 2771m N 25°20.185' - N 25°21.265' E 093°57.794'-E 94°59.172' Elevation: 1479m – 1785m	Dysentery, Jaundice

Sl. No	Scientific Name	Family	Local Name	Parts used	Locality	Satellite location range	Medicinal Uses
